Introduction

Enterprise service management (ESM) has transformed from a structured IT support function into a key driver of enterprise agility, operational resilience and digital innovation. Initially rooted in ITSM methodologies, ESM now extends across HR, finance, operations and customer service. Service providers are pivotal in enabling this transition through cloud, automation and GenAl solutions to create intelligent, proactive service ecosystems.

The current wave of transformation is powered by Al-driven decision engines that optimize workflows, enhance predictive analytics and streamline service orchestration between business and IT. Enterprises increasingly demand service platforms that integrate automation, real-time data insights and engineering-led innovation to improve responsiveness and scalability. Al-powered forecasting and RPA are reshaping delivery models, enabling enterprises to preempt disruptions, streamline operations and enhance UX.

Providers that embed engineering principles into ESM stand out as strategic enablers of business transformation. In a digital-first era, FSM serves as a command center for datadriven decision-making, bridging enterprise portfolios and ensuring service resilience. Providers are also redefining user engagement through self-service portals and intuitive designs, improving satisfaction and efficiency.

This study examines the extensive capabilities of service providers, encompassing functional knowledge, industry process experience, and diverse IT and software support competencies. Service providers should provide a comprehensive suite of services and engineering capabilities, leveraging expertise across industry domains, organizational processes and technology workflows to ensure enterprise-scale transformation and sustainable business outcomes.

Definition

The ISG Provider Lens[™] Enterprise Service Management study offers the following to business and IT decision-makers:

- Transparency on the strengths and weaknesses of relevant providers.
- A differentiated positioning of providers by segments on their competitive strengths and portfolio attractiveness.
- · Focus on the U.S. market.

Our study serves as an important decision-making basis for positioning, key relationships and go-to-market considerations. ISG advisors and enterprise clients also use information from these reports to evaluate their current vendor relationships and potential engagements.

Consulting and Advisory Services

Definition

This quadrant evaluates providers based on their expertise in driving enterprise service strategies, service design and engineering-led innovation across business, corporate and technology portfolios. These providers play a critical role in aligning strategic objectives with modern service management frameworks, ensuring operational excellence. Enterprise service strategy focuses on enabling digital transformation by adopting best practices such as ITIL frameworks and integrating Al-based enterprise systems to drive automation, predictive decision-making and intelligent operations. Providers must have strong experience in enterprise architecture and engineering to create scalable and adaptive solutions. This quadrant also assesses providers that unify strategic consulting, ESM and Al-driven engineering to help organizations achieve intelligent and future-ready transformations.

Eligibility Criteria

- Strategic advisory and digital transformation expertise: Demonstrate deep industry knowledge, guiding enterprises in business transformation, operational excellence and digital-first strategies
- 2. Proven AI-first enterprise systems implementation: Expertise in AI-driven automation, predictive analytics and intelligent business processes to enhance ESM
- 3. Enterprise architecture and service design competency:
 Experience in designing BOA and EOA frameworks that align IT with business strategies

- L. Data- and AI-driven innovation:
 Capabilities in AI/ML-driven
 decision intelligence, data
 analytics and enterprise-wide
 reporting solutions for improved
 insights and automation
- 5. ITIL compliance and best practices implementation: Adherence to ITIL frameworks and best practices implementation for governance, security and risk management to ensure operational resilience and regulatory compliance
- 6. Cloud, DevOps and platform modernization expertise: Ability to support enterprises in adopting cloud-native architectures and DevOps practices for enhanced scalability and agility

7. Proven track record of measurable business impact:
Showcase successful enterprise engagements with tangible outcomes in cost savings, operational efficiencies and

Implementation and Integration Services

Definition

This quadrant evaluates service providers that specialize in seamless enterprise service implementation, system integration, engineering-led innovation and service transition strategies across business, corporate and technology portfolios. Providers in this quadrant must demonstrate expertise in workflow management platforms, ensuring automation-driven process efficiency while integrating internal and external business systems to enhance enterprise-wide interoperability. Their capabilities should also include multiplatform integration to facilitate seamless connectivity across cloud, on-premises and hybrid environments, enabling enterprises to migrate, optimize and manage workloads in cloud-native environments. In addition, service providers must excel in developing various technology architectures for managing scalable application workloads.

Eligibility Criteria

- 1. Expertise in enterprise service implementation and system integration: Proficiency in deploying workflow management platforms, integrating internal and external business systems and ensuring multiplatform interoperability through a robust technology and software partnership ecosystem
- Strong competency in technology architecture: Capabilities in developing scalable application workloads, ensuring portability and composable architecture for modular and reusable enterprise components

- Cloud integration and migration excellence: Experience in seamless cloud adoption, enabling hybrid and multicloud integration with robust security and compliance measures
- 4. API-driven and DevOps integration: Leverage API-based communication, DevOps automation and event-driven architectures to enhance service orchestration and system interoperability
- 5. AI-enabled process automation and intelligent workflows: Use AI/ML-driven automation for predictive analytics, self-healing IT operations and intelligent process automation

- compliance and governance requirements: Ensure cloud security, regulatory compliance and risk management across service implementations and integrations
- 7. Proven track record in scalable and future-ready solutions: Successful engagements with tangible business outcomes, enabling high-availability architectures and continuous enterprise innovation

Managed Services for Converged IT and Business Ops

Definition

This quadrant evaluates providers based on their expertise in enterprise service operations, performance optimization and continual service improvement across IT and business functions. Providers must leverage service automation, implementing Al-driven ITSM and workflow orchestration for enhanced operational efficiency, reliability and proactive monitoring. Additionally, site reliability engineering (SRE) and production readiness engineering (PRE) are critical competencies, ensuring scalability, availability and proactive fault resolution within enterprise IT ecosystems. Beyond operational excellence, providers must focus on integrating GenAl- and Al-powered solutions to enhance predictive maintenance and drive intelligent automation. Their cloud and technology modernization expertise should enable enterprises to adopt cloudnative architectures, modernize platforms and implement agile IT frameworks.

Eligibility Criteria

- Expertise in enterprise service
 operations and optimization:
 Capabilities in performance
 optimization, real-time
 monitoring and proactive
 resource utilization across IT and
 business functions
- 2. Service automation and AIOps:
 Leverage AI-powered automation,
 ITSM orchestration and selfhealing workflows to enhance
 operational efficiency and reduce
 manual intervention
- 3. Expertise in SRE and PRE:
 Implement scalable, fault-tolerant
 and high-availability enterprise
 service models to ensure
 minimal downtime and
 continuous availability

- Proficiency in GenAI and AI-powered solutions: Should integrate AI-driven analytics, predictive insights and automation for intelligent decision-making and process optimization
- 5. Experience in cloud and technology modernization: Enable cloud-native transformations, platform modernization and multicloud integration for IT-business convergence
- 6. CloudOps, FinOps and RiskOps capabilities: Offer cost-efficient cloud management services, financial governance and risk-mitigation strategies for enterprise IT operations

7. Proven track record in scalable and secure managed services: Successful enterprise engagements with tangible results in cost savings, security, automation-driven efficiencies and business resilience

Quadrants by Region

As a part of this ISG Provider Lens™ quadrant study, we are introducing the following three quadrants on Enterprise Service Management — Services:

Quadrant	U.S.
Consulting and Advisory Services	✓
Implementation and Integration Services	✓
Managed Services for Converged IT and Business Ops	✓

Schedule

The research phase falls in the period between March and July 2025, during which survey, evaluation, analysis and validation will take place. The results will be presented to the media in September 2025.

Milestones	Beginning	End
Survey Launch	March 27, 2025	
Survey Phase	March 28, 2025	April 23, 2025
Sneak Preview	July 2025	August 2025
Press Release & Publication	September 2025	

Collecting client testimonials via the Star of Excellence Program requires early client referrals (no official reference needed) because CX scores have a direct influence on the provider's position in the IPL quadrant and the awards.

Please refer to the link to view/download the ISG Provider Lens™ 2025 research agenda.

Access to Online Portal

You can view/download the questionnaire from here using the credentials you have already created or refer to instructions provided in the invitation email to generate a new password. We look forward to your participation!

Buyers Guide

ISG Software Research, formerly "Ventana Research," offers market insights by evaluating technology providers and products through its Buyers Guides. The findings are drawn from the research-based analysis of product and customer experience categories, ranking and rating software providers and products to help facilitate informed decision-making and selection processes for technology.

In the course of the Enterprise Service Management - Services IPL launch, we want to take advantage of the opportunity to draw your attention to related research and insights that ISG Research will publish in 2025. For more information, refer to the Buyers Guide research schedule.

Research Production Disclaimer:

ISG collects data for the purposes of conducting research and creating provider/vendor profiles. The profiles and supporting data are used by ISG advisors to make recommendations and inform their clients of the experience and qualifications of any applicable provider/vendor for outsourcing the work identified by clients. This data is collected as part of the ISG FutureSource™ process and the Candidate Provider Qualification (CPQ) process. ISG may choose to only utilize this collected data pertaining to certain countries or regions for the education and purposes of its advisors and not produce ISG Provider Lens™ reports. These decisions will be made based on the level and completeness of the information received directly from providers/vendors and the availability of experienced analysts for those countries or regions. Submitted information may also be used for individual research projects or for briefing notes that will be written by the lead analysts.

Client Feedback Nominations

ISG Star of Excellence™ - Call for nominations

The Star of Excellence is an independent recognition of excellent service delivery based on the Voice of the Customer concept. ISG has designed the Star of Excellence program to collect client feedback about service providers' success in demonstrating the highest standards of client service excellence and customer centricity.

The global survey is all about services that are associated with IPL studies. In consequence, all ISG Analysts are continuously provided with information on the customer experience of all relevant service providers. This information comes on top of existing first-hand advisor feedback that IPL leverages in its practitionerled consulting approach.

Providers are invited to nominate their clients to participate. Once the nomination has been submitted, ISG sends out a mail confirmation to both sides. It is self-evident that ISG anonymizes all customer data and does not share it with third parties.

It is our vision that the Star of Excellence™ will be recognized as the leading industry recognition for client service excellence and serve as the benchmark for measuring client sentiments.

Our vision for the Star of Excellence is to become acknowledged as the leading industry recognition for client service excellence and serve as the benchmark for measuring client sentiments. To ensure your selected clients complete the feedback for your nominated engagement, please use the "Nominate (for Providers)" section on the Star of Excellence website.

We have set up an email where you can direct any questions or provide comments. This email will be checked daily, please allow up to 24 hours for a reply.

Advisor Involvement - Program Description

ISG Provider Lens™ Advisors Involvement Program

ISG Provider Lens offers market assessments incorporating practitioner insights, reflecting regional focus and independent research. ISG ensures advisor involvement in each study to cover the appropriate market details aligned to the respective service lines/technology trends, service provider presence and enterprise context.

In each region, ISG has expert thought leaders and respected advisors who know the provider portfolios and offerings as well as enterprise requirements and market trends. On average, three consultant advisors participate as part of each study's quality and consistency review process. The consultant advisors ensure each study reflects ISG advisors' experience in the field, which complements the primary and secondary research the analysts conduct. ISG advisors participate in each study as part of the consultant advisors' group and contribute at different levels depending on their availability and expertise.

The consultant advisors:

- · Help define and validate quadrants and questionnaires
- Advise on service provider inclusion, participate in briefing calls
- Give their perspectives on service provider ratings and review report drafts

About Our Company & Research

ISG Provider Lens[™]

The ISG Provider Lens™ Quadrant research series is the only service provider evaluation of its kind to combine empirical, data-driven research and market analysis with the real-world experience and observations of ISG's global advisory team. Enterprises will find a wealth of detailed data and market analysis to help guide their selection of appropriate sourcing partners, while ISG advisors use the reports to validate their own market knowledge and make recommendations to ISG's enterprise clients. The research currently covers providers offering their services across multiple geographies globally.

For more information about ISG Provider Lens™ research, please visit this webpage.

İSG Research

ISG Research™ provides subscription research, advisory consulting and executive event services focused on market trends and disruptive technologies driving change in business computing. ISG Research™ delivers guidance that helps businesses accelerate growth and create more value.

ISG offers research specifically about providers to state and local governments (including counties, cities) as well as higher education institutions. Visit: <u>Public Sector</u>.
