

ABBYY® Vantage® Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from July 2021.

General information

- ABBYY Vantage is a no code / low code intelligent document processing platform of cognitive services delivered as "skills" that applies AI for turning unstructured content into structured, actionable information.
- All license are based on page transaction volume.
- A customer can buy Core Cognitive Skills or Trained Skills. Core Cognitive Skills allow users to create skills and/or use any of the framework skills available in the marketplace.
- Trained skills can process a certain document type, classify the documents from a particular use case for a combination of trained Classification and Document skills into an end-to-end process skill.
- A customer can combine multiple volume tiers for different skills in one license.

ABBYY Vantage Base Licenses

- Prices are fee paid in advance for 1-year Subscription, Page Transactions per Year. Each subscription contract must have a 3 years commitment.
- Business SMUA is included in the license price and grants access to upgrades/patches.
- Subscribing companies are permitted an unlimited number of internal users of the licensed software.
- Delivery options available: ABBYY Public Cloud.

Vantage trial

Trial volume is 2000 total pages for the core skills license, and 1000 pages for each of the trained skills which includes the Invoice, Purchase Order, and Receipt Skills. Trial period is 60 days. For Free.

Vantage Platform Licenses

Core Cognitive Skills

Core Cognitive Skills provide OCR, classification and extraction capabilities allowing customers to train their own Classification Skills and Document Skills based on the customers documents.

Description	Part Number (SKU)	US Dollar (USD)
Vantage Core Cognitive Skills - 50K page transactions	VAN-SC-COG	8,000 USD
Vantage Core Cognitive Skills - 100K page transactions	VAN-SC-COG	13,000 USD
Vantage Core Cognitive Skills - 200K page transactions	VAN-SC-COG	20,000 USD
Vantage Core Cognitive Skills - 500K page transactions	VAN-SC-COG	40,000 USD
Vantage Core Cognitive Skills - 1M page transactions	VAN-SC-COG	70,000 USD
Vantage Core Cognitive Skills - 2M page transactions	VAN-SC-COG	120,000 USD
Vantage Core Cognitive Skills - 5M page transactions	VAN-SC-COG	250,000 USD
Vantage Core Cognitive Skills - 10M page transactions	VAN-SC-COG	400,000 USD
Vantage Core Cognitive Skills - 50M page transactions	VAN-SC-COG	1,750,000 USD

Vantage Trained Document Skills

Trained Classification and Document Skills are fully trained out of the box skills that can classify and extracting relevant data from a specific document type. A customer can purchase an annual volume of a selected Document Skill. Purchasing different volumes of trained skills and combining with a core cognitive skill license is possible. Additional Vantage Skills classified as “framework skills” are downloadable from the ABBYY Marketplace. A “framework skill” consume a core cognitive skill page license.

Invoice Skill

Description	Part Number (SKU)	US Dollar (USD)
Vantage Invoice Skill - 50K page transactions	VAN-SC-INV	10,000 USD
Vantage Invoice Skill - 100K page transactions	VAN-SC-INV	16,250 USD
Vantage Invoice Skill - 200K page transactions	VAN-SC-INV	25,000 USD
Vantage Invoice Skill - 500K page transactions	VAN-SC-INV	50,000 USD
Vantage Invoice Skill - 1M page transactions	VAN-SC-INV	87,500 USD

Vantage Receipt Skill - 10M page transactions	VAN-SC-RCT	500,000 USD
Vantage Receipt Skill - 50M page transactions	VAN-SC-RCT	2,187,500 USD

Vantage Add-ons

Connectors

Vantage Connectors developed by ABBYY are free asset allowing customers to interate the Vantage platform into various automation platforms such as RPA, BPM etc. ABBYY will continue extending the list of available Vantage Connectors, while at the same time third parties may develop their own Vantage Connectors. Both ABBYY and third party connectors are available to customers through the ABBYY Marketplace.

Type	Part Number (SKU)	US Dollar (USD)
Vantage Connector for Blue Prism	VAN-O-CON-BP	for free
Vantage Connector for UiPath	VAN-O-CON-UP	for free
Vantage Connector for Alteryx	VAN-O-CON-AL	for free
Vantage Connector for Automation Anywhere	VAN-O-CON-AA	for free

Development & Test System, Backup License

This license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the page transactions count. If the development/test and backup systems are separate installations, each requires its own license. If the page transactions volume is ≥ 1 million page volume, one license (Test/Development/Backup) is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup license, one of them is for free, others are 20% of the base license.

Type	Part Number (SKU)	US Dollar (USD)
for a full license with < 1M Page Transactions count	VAN-SC-BU	20% of the list price, annual fee
FREE for a full license with = > 1M Page Transactions count	VAN-SC-BU-FL	for free

Upgrade Support

Enterprise Support

Type	Part Number (SKU)	US Dollar (USD)
Upgrade to Enterprise subscription with minimal annual recurring revenue \$50K	VAN-SC-E	=Business Subscription price*0,15

ABBYY® FlexiCapture® (FC) Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as an ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from October 2019.

General information

- FlexiCapture is an Intelligent Document Processing platform which brings together the best NLP, machine learning, and advanced recognition capabilities to handle every type of document and every job size.
- Distributed installation mode is default.

Standard Delivery Package

- FlexiCapture Distributed licenses include one station of each type (scanning, (data) verification, web capture).
- All Stations are concurrent and can be deployed as local stations (domain network), remote stations and as web stations (browser-based).
- FlexiCapture Distributed License also include 1 Project Setup Station, 1 FlexiLayout Studio license, 1 FormDesigner license, 1 Processing Server license, 1 Application Server license together with unlimited Processing Stations.

FlexiCapture On-Premise Base Licenses

Subscription Licenses

Prices are annual fee for 1-year Business Subscription, Pages per Year. Enterprise clients should be quoted for Enterprise Subscription. 3-year subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. FlexiCapture On-Premise Add-Ons

Timeline add-on

ABBYY Timeline annual subscription is available as an add-on to ABBYY FlexiCapture for the purpose of process mining of FC-generated events. It should be sold in conjunction with a full ABBYY FlexiCapture On-Premise License. The add-on supplies 1 user, 1 Project for up to 10M data volume, for Windows platform. Prices are annual fee for 1-year Business Subscription. If ABBYY FlexiCapture license is Perpetual, recalculate it's price in a Subscription equivalent first, and then apply 25% add-on rate. Annual Subscription price = (Perpetual Total Price incl. Add-ons + (SMUA * 3)) / 3

Type	Part Number (SKU)	US Dollar (USD)
Timeline for FlexiCapture (Only FC Generated Events)	FC-S-TI	25% of the FC Subscription equivalent list price, annual fee

Mobile SDK add-ons

Mobile Web Capture

ABBYY Mobile Web Capture is a JavaScript based SDK that can be embedded into web-based on-boarding processes to automatically capture any document using a mobile camera and submitting the image to FlexiCapture for further backend processing. Is available as add-on to and only in conjunction with a full FlexiCapture On-Premise License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Web Capture Subscription	FC-S-MWC	20% of license list price, annual fee
Mobile Web Capture One-time	FC-O-MWC	20% of license list price

Mobile Capture Imaging

ABBYY Mobile Capture is an SDK which offers automatic data capture within native mobile applications, providing real-time recognition and capturing photos of documents for on-device or back-end processing. Is available as add-on to and only in conjunction with a full FlexiCapture On-Premise License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Capture Imaging for a Subscription license	FC-S-MCI	20% of license list price, annual fee
Mobile Capture Imaging for a TPC license	FC-O-MCI	20% of license list price

Additional Workstations, Design Tools

One station and one design tool of each type is included in the standard delivery package for FlexiCapture license delivery by default. One "station" means a full set of stations (Verification, Scanning, Web Capture and Data Verification stations) rich/web. Additional workstations are available for sale as single stations or in packs of 3, 5, 10 or 20 stations. Additional design tools are available for 0-price supply in accordance with client's request.

Additional Design Tools for all license types

Tool	Part Number (SKU)	US Dollar (USD)
Project Setup Station	FC-O-APS	for free
FlexiLayout Studio	FC-O-AFL	for free

Additional Workstations for subscription licenses. Annual fee for 1-year subscription.

Quantity	Part Number (SKU)	US Dollar (USD)
1 station	FC-S-AS	800 USD
3 stations	FC-S-3AS	2,350 USD
5 stations	FC-S-5AS	3,840 USD

10 stations	FC-S-10AS	7,655 USD
20 stations	FC-S-20AS	15,040 USD
Additional Workstations for TPC licenses. Valid until the end of TPC license		
Quantity	Part Number (SKU)	US Dollar (USD)
1 station	FC-O-AS	960 USD
3 stations	FC-O-3AS	2,820 USD
5 stations	FC-O-5AS	4,610 USD
10 stations	FC-O-10AS	9,190 USD
20 stations	FC-O-20AS	18,050 USD

Development & Test System/Backup License

This license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the page count. If the development/test and backup systems are separate installations, each requires its own license. If the page volume is ≥ 1 million page volume, one license (Test/Development/Backup) is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup license, one of them is for free, others are 20% of the base license.

Description	Part Number (SKU)	US Dollar (USD)
when a full license is Subscription with 50k - 750k page count	FC-S-BU	20% of license list price, annual fee
when a full license is TPC with 50k - 750k page count	FC-O-BU	20% of license list price
FREE when a full license is TPC with 1m pages count and above	FC-P-BU-FL	for free
FREE when a full license is Subscription with 1m pages count and above	FC-S-BU-FL	for free

Connectors

ABBYY FlexiCapture Connectors provide the integration between ABBYY Capture products and different content-driven business applications.

Type	Part Number (SKU)	US Dollar (USD)
FlexiCapture Connector for Blue Prism	FCX00WXXX-AAA00X-BP	for free
FlexiCapture Connector for UiPath	FCX00WXXX-AAA00X-UP	for free
FlexiCapture Connector for M-Files	FCX00WXXX-AAA00X-MF	for free
FlexiCapture Connector for Pega	FCX00WXXX-AAA00X-PG	for free
FlexiCapture Connector for Appian	FCX00WXXX-AAA00X-AP	for free
FlexiCapture Connector for Laserfiche	FCX00WXXX-AAA00X-LF	for free
FlexiCapture Connector for WinActor	FCX00WXXX-AAA00X-WA	for free
FlexiCapture Connector for Bizagi	FCX00WXXX-AAA00X-BZ	for free
FlexiCapture Connector for Automation Anywhere	FCX00WXXX-AAA00X-AA	for free
FlexiCapture Connector for NX Manager	FCX00WXXX-AAA00X-NX	for free

Other add-ons

FormDesigner is a software application for creating machine-readable forms that will be processed using ABBYY FlexiCapture. This is available free of charge per request. We offer use of ISIS driver for high speed scanners in order to configure basic scanning options.

ICR Handwriting add-on provides high accuracy of handwritten data processing. No discounts can be applied to this add-on even when a related license is discounted. FlexiCapture Distributed full license includes all additional OCR languages excepting Japanese, which can be sold as a language add-on. Additional language support is offered for Japanese language to recognize machine printed text in these language.

Description	Part Number (SKU)	US Dollar (USD)
FormDesigner	FC-P-FD	for free
ISIS driver	FC-P-AD-ISIS	for free
ICR Handwriting add-on for Subscription	FC-S-ICR	40% of license list price, annual fee
Language add-on for Subscription	FC-S-AD-L	30% of license list price, annual fee
Language add-on for TPC	FC-O-AD-L	30% of license list price

FlexiCapture Trial License

Trial volume is 3000 TPC (Total page count). Trial period is 30 days. Both products FlexiCapture and FlexiCapture for Invoices have the same Trial License.

Description	Part Number (SKU)	US Dollar (USD)
1000 TPC, 30 days		for free

FlexiCapture Standalone (Subscription) Licenses

A standard delivery package of Standalone installation comprises 1 Administrator/Operator, 1 FlexiLayout Studio license, and 1 FormDesigner license. 3-year subscription is the minimum commitment for every deal. Subscription license is automatically prolonged after one year. No core limitation. Business SMUA (20%) is included in the license price and grants access to upgrades/patches. One station of each type is included in the license price.

PPY	Part Number (SKU)	US Dollar (USD)
50k	FC-SA-S-PY-50K	4,550 USD
100k	FC-SA-S-PY-100K	7,060 USD
200k	FC-SA-S-PY-200K	10,910 USD

Key Functionality & Features

The following functionality and features are included in the FlexiCapture base license.

Functionality/Feature	Explanation
Recognition languages	Support for over 200 recognition languages in all combinations. Dictionary support is available for 63 languages, ICR is available for 130 languages. The list of all OCR languages is available at https://www.abbyy.com/en-en/flexicapture/specifications/ OCR languages Chinese, Korean, Thai, Vietnamese, Arabic are included by default, Japanese is included for Japan market.
User Interface Languages	Chinese (Simplified), Czech, English, French, German, Hungarian, Japanese, Korean, Polish, Portuguese (Brazilian), Russian, Spanish, Serbian.
Digitally born documents	Detect the exact type of digital documents (spreadsheets, images, logos, etc.) and different areas within a document, even when text appears unreadable. Word, Excel, PDF, email bodies, scanned images, and other digital documents can be processed in the same flow.
Intelligent capture & Natural Language Processing	Natural Language Processing (NLP) extends capture capabilities to process unstructured documents such as contracts, leases, articles, agreements, and emails. NLP is not available by default, please request it separately to fine-tune it for custom workflows. Supported languages: English, German, Russian, Spanish, French.
Image enhancement	Enhanced Image pre-processing enables automatic clean-up and enhancement of images arriving from desktop scanning or mobile scanning. All images go through image enhancement and pre-processing, a process in which scanned images are altered to make them more suitable for analysis and recognition. This process includes operations such as removing noise (e.g. de-speckling), de-skewing (rotate), correct distortions and binarisation.
Advanced Classification	Classify documents into different types (e.g., driver's license, bank statement, tax form, contract, invoice, etc.) and variations (e.g., invoices from different vendors) to automatically sort incoming documents and route them to predefined destinations. FlexiCapture offers image, text, or rule-based classification methods that can be combined into a hierarchical system to deliver the greatest straight-through processing performance and reduced manual review. Advanced classification can be used for document type identification, documents separation into different classes document set integrity check, documents identification that require processing within the flow and checks if signatures or stamps exist in the document.
Auto-learning	Auto learning/machine learning is applied in both setup and live (learning on the fly) scenarios through intuitive "point-and-learn" user guidance. Automated training of classification models through deep learning with minimum human supervision. A continuous end-user feedback loop improves system performance over time improving accuracy, reduces the need for offline maintenance and system downtime, and removes the need for on-going professional services costs.
Scalability and enhanced performance	FlexiCapture can be scaled both vertically and horizontally when deployed to support high volume and fast document processing scenarios. Whether you need to process more than 3 million documents per day or 2,000 pages per minute, the architecture of FlexiCapture can grow to meet your processing requirements. You can control multi-server installations, distributed infrastructure, and operators via centralized configuration and management.
Multitenancy	Create a secured and isolated environment for tenants and apply common policies for different users with the multi-tenancy feature. Use secure, centralized administration tools and separated licenses to protect data across multiple workgroups with less time for set-up. The multi-tenant architecture allows several different groups of users to work within the system while having no access to each other's data and configuration parameters.
Document sets	Many business processes use documents that are all related to one another because they serve some common purpose. In ABBYY FlexiCapture, documents of this sort can be grouped together into document sets. Multiple linked documents can be processed as one complete case file, with various assembly, processing and validation checks, to improve efficiency in more complex case management scenarios (e.g. customer on-boarding scenarios, mortgage applications, insurance reports, and claims management). These scenarios imply not only document recognition, but also the need to check if all required documents have been provided (completeness check) and that all of them belong to the same case (continuity check), e.g. verify that the person name is the same in all submitted documents.
Reporting Module	Get valuable insights into the process performance – it allows evaluating the effectiveness of ABBYY FlexiCapture to discover the main cost of processing. More granularity with drilldown to the specified business rules. Analyze amount of straight-through processed documents and reduce time spent on verification. Spot potential areas for improvement by tracking resources and duration to your process. Export details to Excel, BI tools, or ABBYY Timeline to visualize reports.
Service Level Agreement (SLA) support	SLA monitoring and enforcement functionality provides a mechanism for document processing prioritisation and resource control to achieve required service levels (meet internal own goals, meet regulatory requirements).

Single Sign-On	Single sign-on (SSO) enables users to securely authenticate with multiple applications and websites by logging in only once. The most popular identity providers, such as Active Directory, Azure Active Directory, OKTA, and OneLogin, are supported out-of-the-box.
Comand Line Interface (CLI)	With new Comand Line Interface (CLI), you can easily administrate distributed environments when you need to setup or synchronise different product installations, reuse the result of Machine learning for all projects, or backup or restore existing projects.
Export file formats	Data export formats: XLS, DBF, CSV, TXT, XML, JSON Image export formats: TIFF, JPEG, PDF, PDF/A (Standard allows you to select the version of the format standard. By default, the version of the standard is detected automatically. For PDF/A the following standard versions are available: 1a, 1b, 2a, 2b, 2u, 3a, 3b, 3u), BMP, JPEG2000, PCX packbits, PNG
Flexible customization and integration	FlexiCapture Web API and customization scripts enable the development of custom solutions, support specific business scenarios, and ensure easy integration into enterprise workflows.
Smooth integration with connectors	FlexiCapture's robust APIs and progressive scripting enable tight integration with any systems of record and engagement. Default connectors for UiPath, BluePrism, Pega, Appian, M-Files, Automation Anywhere, Bizagi, NX Manager and Laserfiche are also available.

To learn more about the supported functionality please follow the link <https://www.abby.com/en-us/flexicapture/specifications/>

ABBYY FlexiCapture for Invoices (FCI) Price List - North America as of October 2021

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.

FCI On-Premise Add-Ons

Timeline add-on

ABBYY Timeline annual subscription is available as an add-on to ABBYY FlexiCapture for Invoices for the purpose of process mining of FCI-generated events. It should be sold in conjunction with a full ABBYY FlexiCapture for Invoices On-Premise License. The add-on supplies 1 user, 1 Project for up to 10M data volume, for Windows platform. Prices are annual fee for 1-year Business Subscription. If ABBYY FlexiCapture for Invoices license is Perpetual, recalculate it's price in a Subscription equivalent first, and then apply 25% add-on rate.

Type	Part Number (SKU)	US Dollar
Timeline for FlexiCapture for Invoices (Only FCI Generated Events)	FC-S-TI	25% of the FCI Subscription equivalent list price, annual fee

Mobile SDK add-ons

Mobile Web Capture

ABBYY Mobile Web Capture is a JavaScript based SDK that can be embedded into web-based on-boarding processes to automatically capture any document using a mobile camera and submitting the image to FlexiCapture for Invoices for further backend processing. Is available as add-on to and only in conjunction with a full FlexiCapture for Invoices On-Premise License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Web Capture Subscription	FCI-S-MWC	10% of license list price, annual fee
Mobile Web Capture for a TPC license	FCI-O-MWC	10% of license list price

Mobile Capture Imaging

ABBYY Mobile Capture is an SDK which offers automatic data capture within native mobile applications, providing real-time recognition and capturing photos of documents for on-device or back-end processing. Is available as add-on to and only in conjunction with a full FlexiCapture for Invoices On-Premise License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Capture Imaging for a Subscription license	FCI-S-MCI	10% of license list price, annual fee
Mobile Capture Imaging for a TPC license	FCI-O-MCI	10% of license list price

Additional Design Tools

Additional design tools are available for 0-price supply in accordance with client's request for [all license types](#)

Tool	Part Number (SKU)	US Dollar (USD)
Project Setup Station	FCI-O-APS	for free
FlexiLayout Studio	FCI-O-AFL	for free

Development & Test System, Backup License

This license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the invoice count. If the development/test and backup systems are separate installations, each requires its own license. If the page volume is $\geq 300K$ invoice volume, one license (Test/Development/Backup) is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup license, one of them is for free, others are 20% of the base license.

IPY	Part Number (SKU)	US Dollar (USD)
when a full license is Subscription with invoice count less than 300k (page count less than 900k)	FCI-S-BU	20% of license list price, annual fee
when a full license is TPC with invoice count less than 300k (page count less than 900k)	FCI-O-BU	20% of license list price
FREE when a full license is Subscription with 300k invoice count and above (page count 900k and above)	FCI-S-BU-FL	for free
FREE when a full license is TPC with 300k invoice count and above (page count 900k and above)	FCI-P-BU-FL	for free

Connectors

ABBYY FlexiCapture Connectors provide the integration between ABBYY Capture products and different content-driven business applications.

Type	Part Number (SKU)	US Dollar (USD)
FlexiCapture Connector for Blue Prism	FCX00WXXXX-XAAXX-BP	for free
FlexiCapture Connector for UiPath	FCX00WXXXX-XAAXX-UP	for free
FlexiCapture Connector for M-Files	FCX00WXXXX-XAAXX-MF	for free
FlexiCapture Connector for Pega	FCX00WXXXX-XAAXX-PG	for free

FlexiCapture Connector for Appian	FCX00WXXXX-XAAXXX-AP	for free
FlexiCapture Connector for Laserfiche	FCX00WXXXX-XAAXXX-LF	for free
FlexiCapture Connector for WinActor	FCX00WXXXX-XAAXXX-WA	for free
FlexiCapture Connector for Bizagi	FCX00WXXXX-XAAXXX-BZ	for free
FlexiCapture Connector for Automation Anywhere	FCX00WXXXX-XAAXXX-AA	for free
FlexiCapture Connector for NX Manager	FCX00WXXXX-XAAXXX-NX	for free

Other add-ons

FormDesigner is a software application for creating machine-readable forms that will be processed using ABBYY FlexiCapture. This is available free of charge per request. We offer use of ISIS driver for high speed scanners in order to configure basic scanning options. ICR Handwriting add-on provides high accuracy of handwritten data processing. No discounts can be applied to this add-on even when a related license is discounted. FlexiCapture Distributed full license includes all additional OCR languages excepting Japanese, which can be sold as a language add-on. Additional language support is offered for Japanese language to recognize machine printed text in these language.

Type	Part Number (SKU)	US Dollar (USD)
FormDesigner	FC-P-FD	for free
ISIS driver	FC-P-AO-ISIS	for free
ICR Handwriting add-on for Subscription	FCI-S-ICR	40% of license list price, annual fee
Language add-on for Subscription	FCI-S-AO-L	30% of license list price, annual fee
Language add-on for TPC	FCI-O-AO-L	30% of license list price

FlexiCapture for Invoices Trial License

Trial volume is 1K TPC (Total page count). Trial period is 30 days. Both products FlexiCapture and FlexiCapture for Invoices have the same Trial License.

Type	Part Number (SKU)	US Dollar (USD)
1000 TPC, 30 days		for free

Key Functionality & Features

The following functionality and features are included in the FlexiCapture for Invoices base license.

Functionality/Feature	Explanation
Supported countries and languages	FlexiCapture for Invoices features a predefined set of processing rules (required keywords, language, currency, date formats, number formats, validation rules, tax rates, etc.) for a range of countries . Once the the country of the invoiced business unit is identified, FCI applies the country-specific settings. Countries: Australia, Austria, Belgium, Canada, Czech Republic, France, Germany, Great Britain, Japan, Hungary, Ireland, Italy, Netherlands, New Zealand, Poland, Spain, Switzerland, United States. Languages: Bulgarian, Croatian, Czech, Dutch, English, French, German, Japanese, Hungarian, Italian, Polish, Romanian, Russian, Spanish, Swedish.

User Interface Languages	Chinese (Simplified), Czech, English, French, German, Hungarian, Japanese, Korean, Polish, Portuguese (Brazilian), Russian, Spanish, Serbian.
High Out-of-the-box quality	Get the superior quality when you only start using FlexiCapture for Invoices. The system is already trained with numerous variants of invoices, using neural networks technology, saving you time and money . When you begin processing the invoices, no need for you to start with the fine-tuning and training on the samples.
Ready-to-go PO processing	Automate purchase order processing with the preconfigured project that contains the fields, rules, country settings, and validation rules required to capture data from purchase orders. Built on the same principles and technologies used for invoice processing, the solution now provides out-of-the box extraction of main fields both in purchase orders and invoices.
Out-of-the-box receipts processing for expense management	Streamline receipt processing for expense management without any additional configurations. Run this ready-to-use type of project to capture receipts from business trips or out-of-pocket expenses and flexibly customize the preconfigured receipts project to suit your business requirements.
Digitally born documents	Detect the exact type of digital documents (spreadsheets, images, logos, etc.) and different areas within a document, even when text appears unreadable. Word, Excel, PDF, email bodies, scanned images, and other digital documents can be processed in the same flow.
Image enhancement	Enhanced Image pre-processing enables automatic clean-up and enhancement of images arriving from desktop scanning or mobile scanning. All images go through image enhancement and pre-processing, a process in which scanned images are altered to make them more suitable for analysis and recognition. This process includes operations such as removing noise (e.g. de-speckling), de-skewing (rotate), correct distortions and binarisation.
Advanced Classification	FlexiCapture offers image, text, or rule-based classification methods that can be combined into a hierarchical system to deliver the greatest straight-through processing performance and reduced manual review. Classification technology detects every incoming document type, including images, by using deep learning Convolutional Neural Networks and sorts documents by appearance or pattern; and text classification which relies on statistical and semantic text analysis. Use any of these technologies separately or simultaneously to deliver faster response times and prompt decision making. Advanced classification can be used for the whole document flow in order to process not only invoices but the other types of documents within the same processing.

PO matching	FCL can match invoice data against the actual purchase orders at the verification stage (connection to a database of orders or contracts is required).
Line Items support	ABBYY supports table Line Items extraction such as: Article Number, Description, Unit Price, Quantity, TotalPriceNetto, VatCode, Vat Value, Vat Percentage, Total Price Brutto. A table extraction of line items can be performed with or without purchase order data.
Machine learning by user side	Increases extraction quality, while you use the solution, it starts learning by feedback on your documents. The more you use the solution, the better quality of results you get. Controllable on-the-fly training technology enables immediate data detection refinement directly by an accountant while reviewing the invoice. As opposed to "black-box"-like self-learning systems, ABBYY FlexiCapture for Invoices gives IT staff full control over the training results.
Scalability and enhanced performance	FlexiCapture can be scaled both vertically and horizontally when deployed to support high volume and fast document processing scenarios. Whether you need to process more than 3 million documents per day or 2,000 pages per minute, the architecture of FlexiCapture can grow to meet your processing requirements. You can control multi-server installations, distributed infrastructure, and operators via centralized configuration and management.
Multitenancy	Create a secured and isolated environment for tenants and apply common policies for different users with the multi-tenancy feature. Use secure, centralized administration tools and separated licenses to protect data across multiple workgroups with less time for set-up. The multi-tenant architecture allows several different groups of users to work within the system while having no access to each other's data and configuration parameters.
Document sets	<p>Many business processes use documents that are all related to one another because they serve some common purpose.</p> <p>In ABBYY FlexiCapture, documents of this sort can be grouped together into document sets.</p> <p>Multiple linked documents can be processed as one complete case file, with various assembly, processing and validation checks, to improve efficiency in more complex case management scenarios (e.g. customer on-boarding scenarios, mortgage applications, insurance reports, and claims management). These scenarios imply not only document recognition, but also the need to check if all required documents have been provided (completeness check) and that all of them belong to the same case (continuity check), e.g. verify that the person name is the same in all submitted documents. With the Document sets feature you can create a table with the similar fields from different invoices to streamline the document processing of the group of similar documents and enable automated expense management for a well-rounded travel policy.</p>

Reporting Module	Get valuable insights into the process performance – it allows evaluating the effectiveness of ABBYY FlexiCapture to discover the main cost of processing. More granularity with drilldown to the specified business rules. Analyze amount of straight-through processed documents and reduce time spent on verification. Spot potential areas for improvement by tracking resources and duration to your process. Export details to Excel, BI tools, or ABBYY Timeline to visualize reports.
Service Level Agreement (SLA) support	SLA monitoring and enforcement functionality provides a mechanism for document processing prioritisation and resource control to achieve required service levels (meet internal own goals, meet regulatory requirements).
Single Sign-On	Single sign-on (SSO) enables users to securely authenticate with multiple applications and websites by logging in only once. The most popular identity providers, such as Active Directory, Azure Active Directory, OKTA, and OneLogin, are supported out-of-the-box.
Comand Line Interface (CLI)	With new Comand Line Interface (CLI), you can easily admistratre distributed environments when you need to setup or synchronise different product installations, reuse the result of of Machine learning for all projects, or backup or restore existing projects.
Export file formats	Data export formats: XLS, DBF, CSV, TXT, XML, JSON Image export formats: TIFF, JPEG, PDF, PDF/A (Standard allows you to select the version of the format standard. By default, the version of the standard is detected automatically. For PDF/A the following standard versions are available: 1a, 1b, 2a, 2b, 2u, 3a, 3b, 3u), BMP, JPEG2000, PCX packbits, PNG
Flexible customization and integration	FlexiCapture Web API and customization scripts enable the development of custom solutions, support specific business scenarios, and ensure easy integration into enterprise workflows.
Smooth Integration with connectors	FlexiCapture's robust APIs and progressive scripting enable tight integration with any systems of record and engagement. Default connectors for UiPath, BluePrism, Pega, Appian, M-Files, Automation Anywhere, Bizagi, NX Manager and Laserfiche are also available.

ABBYY FlexiCapture Cloud (FCC) Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as an ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from October 2019.

General information

- FlexiCapture Cloud delivers ABBYY's advanced data capture platform capabilities via REST API and web interfaces.
- ABBYY FlexiCapture Cloud service is hosted on Microsoft Azure cloud environment.
- FlexiCapture Cloud is available as a Pages limited Subscription license only. It allows the usage of unlimited CPU cores and multiple processing stations for high-performance document processing.
- The multi-tenant architecture of FlexiCapture Cloud allows several different groups of users to work within the system while having no access to each other's data and configuration parameters. Public cloud-based deployment reduces time to market and opens up new opportunities for small and medium sized organizations who no longer need to invest in infrastructure or on-going administrative costs to access powerful capabilities.

Standard Delivery Package

- FlexiCapture Cloud license includes amount of stations - scanning, verification, web capture, data verification - depending on subscription page volume. Administration and Monitoring console is included without usage limitation. Stations can be deployed either as web (scanning, verification, web capture, data verification) or Windows Application (scanning, data verification), or remote (scanning, verification, data verification) stations.
- FlexiCapture Cloud Developer package includes 1 Project Setup Station, 1 FlexiLayout Studio license, 1 FormDesigner license.
- One Mobile Web Capture license is provided for free per client's request for the first year of subscription.

FlexiCapture Cloud Base Licenses

Subscription Licenses

Prices are annual fee for 1-year Business Subscription, Pages per Year. Enterprise clients should be quoted for Enterprise Subscription. 3-year subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. Business Subscription can be upgraded to Enterprise Subscription (which includes a more advanced support level) for an additional payment.

Business Subscription

FlexiCapture Cloud Add-Ons

Mobile SDK add-ons

Mobile Web Capture

ABBYY Mobile Web Capture is a JavaScript based SDK that can be embedded into web-based on-boarding processes to automatically capture any document using a mobile camera and submitting the image FlexiCapture Cloud for further backend processing. Is available as add-on to and only in conjunction with a Full FlexiCapture Cloud License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Web Capture Subscription	FCC-S-MWC	Free for the Year 1; 10% of license list price (annual fee) starting from the Year 2

Mobile Capture Imaging

ABBYY Mobile Capture is an SDK which offers automatic data capture within native mobile applications, providing real-time recognition and capturing photos of documents for on-device or back-end processing. Is available as add-on to and only in conjunction with a Full FlexiCapture Cloud License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Capture Imaging Subscription	FCC-S-MCI	10% of license list price, annual fee

Additional Workstations, Design Tools

FlexiCapture Cloud license includes amount of work stations (scanning, verification, web capture) depending on subscription page volume. One "station" means you can use one station of each type simultaneously: Verification, Scanning, Web Capture, Data Verification. Additional workstations are available for sale as single stations or in packs of 3, 5, 10 or 20 stations. Additional design tools are available for 0-price supply in accordance with client's request.

Additional Design Tools

Tool	Part Number (SKU)	US Dollar (USD)
Project Setup Station	FCC-S-APS	for free
FlexiLayout Studio	FCC-S-AFL	for free

Additional Work Stations

Quantity	Part Number (SKU)	US Dollar (USD)
1 station	FCC-S-AS	800 USD
3 stations	FCC-S-3AS	2,350 USD
5 stations	FCC-S-5AS	3,840 USD
10 stations	FCC-S-10AS	7,655 USD
20 stations	FCC-S-20AS	15,040 USD

REST API, Development & Test System/Backup License

FlexiCapture Cloud's REST API enables tight integration with customer's core business systems, expands FlexiCapture value due to better integration capabilities and easier consumption, modern architecture and faster service delivery options.

- Development & Test System/Backup license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the page count. If the development/test and backup systems are separate installations, each requires its own license. If the page volume is ≥ 1 million page volume, one tenant (Test/Development/Backup) is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup tenant, one of them is for free, others are 20% of the base license.

Type	Part Number (SKU)	US Dollar (USD)
REST API	FCC00CHPX-SPYCX-API	for free
Development/Test/Backup License when a cloud subscription with 50k - 750k page count	FCC-S-BU	20% of license list price
Development/Test/Backup License FREE when a cloud subscription with 1m pages count and above	FCC-BU-FL	for free

Connectors

ABBYY FlexiCapture Connectors provide the integration between ABBYY Capture products and different content-driven business applications.

Type	Part Number (SKU)	US Dollar (USD)
FlexiCapture Connector for Blue Prism	FCX00WXXX-XAAXXX-BP	for free
FlexiCapture Connector for UIPath	FCX00WXXX-XAAXXX-UP	for free
FlexiCapture Connector for M-Files	FCX00WXXX-XAAXXX-MF	for free
FlexiCapture Connector for Pega	FCX00WXXX-XAAXXX-PG	for free
FlexiCapture Connector for Appian	FCX00WXXX-XAAXXX-AP	for free
FlexiCapture Connector for WinActor	FCX00WXXX-XAAXXX-WA	for free
FlexiCapture Connector for Bizagi	FCX00WXXX-XAAXXX-BZ	for free
FlexiCapture Connector for NX Manager	FCX00WXXX-XAAXXX-NX	for free

Other add-ons

FormDesigner is a software application for creating machine-readable forms that will be processed using ABBYY FlexiCapture. This is available free of charge per request.

We offer use of ISIS driver for high speed scanners in order to configure basic scanning options.

ICR Handwriting add-on provides high accuracy of handwritten data processing. No discounts can be applied to this add-on even when a related license is discounted.

FlexiCapture Distributed Full license includes all additional OCR languages excepting Japanese, which can be sold as a language add-on. Additional language support is offered for Japanese language to recognize machine printed text in these language.

Type	Part Number (SKU)	US Dollar (USD)
FormDesigner	FC-P-FD	for free
ISIS driver	FC-P-AO-ISIS	for free
ICR Handwriting add-on	FCC-S-ICR	40% of license list price
Language add-on	FCC-S-AO-L	30% of license list price

FlexiCapture Cloud Trial License

Trial volume is 1000 TPC (Total page count). Trial period is 30 days. Both products FlexiCapture Cloud and FlexiCapture for Invoices Cloud have the same Trial License.

Type	Part Number (SKU)	US Dollar (USD)
------	-------------------	-----------------

1000 TPC, 30 days	FCC-Trial	for free
-------------------	-----------	----------

Key Functionality & Features	
The following functionality and features are included in the FlexiCapture Cloud base license.	
Functionality/Feature	Explanation
Recognition languages	Support for over 200 recognition languages in all combinations. Dictionary support is available for 63 languages, ICR is available for 130 languages. The list of all OCR languages is available at https://www.abby.com/en-eu/flexicapture/specifications/ OCR languages Chinese, Korean, Thai, Vietnamese, Arabic are included by default, Japanese is included for Japan market.
User Interface Languages	Chinese (Simplified), Czech, English, French, German, Hungarian, Japanese, Korean, Polish, Portuguese (Brazilian), Russian, Spanish, Serbian.
Digitally born documents	Detect the exact type of digital documents (spreadsheets, images, logos, etc.) and different areas within a document, even when text appears unreadable. Word, Excel, PDF, email bodies, scanned images, and other digital documents can be processed in the same flow.
Intelligent capture & Natural Language Processing	Natural Language Processing (NLP) extends capture capabilities to process unstructured documents such as contracts, leases, articles, agreements, and emails. NLP is not available by default, please request it separately to finetune it for custom workflows. Supported languages: English, German, Russian, Spanish, French.
Image enhancement	Enhanced Image pre-processing enables automatic clean-up and enhancement of images arriving from desktop scanning or mobile scanning. All images go through image enhancement and pre-processing, a process in which scanned images are altered to make them more suitable for analysis and recognition. This process includes operations such as removing noise (e.g. de-speckling), de-skewing (rotate), correct distortions and binarisation.
Advanced Classification	Classify documents into different types (e.g., driver's license, bank statement, tax form, contract, invoice, etc.) and variations (e.g., invoices from different vendors) to automatically sort incoming documents and route them to predefined destinations. FlexiCapture offers image, text, or rule-based classification methods that can be combined into a hierarchical system to deliver the greatest straight-through processing performance and reduced manual review. Advanced classification enables document type identification, documents separation into different classes document set integrity check, documents identification that require processing within the flow and checks if signatures or stamps exist in the document.
Auto-learning	Auto learning/machine learning is applied in both setup and live (learning on the fly) scenarios through intuitive "point-and-learn" user guidance. Automated training of classification models through deep learning with minimum human supervision.
Scalability and enhanced performance	The cloud-based service dynamically scales up to meet high load levels without requiring additional expenditures on resources and equipments
REST API	ABBY FlexiCapture Cloud REST API enables easy integration with your systems. REST API allows external systems to upload documents and receive extraction results, trains FlexiCapture by providing feedback about the result quality, and develops customized verification.
Service Level Agreement	ABBY guarantees cloud service availability of 99%.
Single Sign-On	Single sign-on (SSO) enables users to securely authenticate with multiple applications and websites by logging in only once. The most popular identity providers, such as Active Directory, Azure Active Directory, OKTA, and OneLogin, are supported out-of-the-box.
Export file formats	Data export formats: XLS, DBF, CSV, TXT, XML, JSON

To learn more about the supported functionality please follow the link <https://www.abby.com/en-us/flexicapture-cloud/specifications/>

ABBYY FlexiCapture for Invoices Cloud (FCIC) Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.

General information

- FlexiCapture for Invoices Cloud delivers ABBYY's advanced invoice capture capabilities via REST API and web interfaces.
- ABBYY FlexiCapture for Invoices Cloud service is hosted on Microsoft Azure cloud environment.
- FlexiCapture for Invoices Cloud is available as a Pages limited Subscription license only. It allows the usage of unlimited CPU cores and multiple processing stations for high-performance document processing. IPY licenses are only limited by the number of invoices to process per year. One invoice is considered to be 3 pages maximum.
- The multi-tenant architecture of FlexiCapture for Invoices Cloud allows several different groups of users to work within the system while having no access to each other's data and configuration parameters. Public cloud-based deployment reduces time to market and opens up new opportunities for small and medium sized organizations who no longer need to invest in infrastructure or on-going administrative costs to access powerful capabilities.

Standard Delivery Package

- FlexiCapture for Invoices Cloud license includes unlimited amount of stations: scanning, verification, web capture, data verification. Administration and Monitoring console is included without usage limitation. Stations can be deployed either as web (scanning, verification, web capture, data verification) or Windows Application (scanning, data verification), or remote (scanning, verification, data verification) stations.
- FlexiCapture Cloud for Invoices Developer package includes 1 Project Setup Station, 1 FlexiLayout Studio license, 1 FormDesigner license.
- One Mobile Web Capture license is provided for free per client's request for the first year of subscription.

FlexiCapture for Invoices Cloud Base Licenses

Subscription Licenses

Prices are annual fee for 1-year Business Subscription, Invoices per Year. Enterprise clients should be quoted for Enterprise Subscription. 3-year subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. Business Subscription can be upgraded to Enterprise Subscription (which includes a more advanced support level) for an additional payment. Unlimited amount of stations of each type is included in the license price.

REST API, FlexiCapture for Invoices Cloud Add-Ons

Mobile SDK add-ons

Mobile Web Capture

ABBYY Mobile Web Capture is a JavaScript based SDK that can be embedded into web-based on-boarding processes to automatically capture any document using a mobile camera and submitting the image to FlexiCapture for Invoices Cloud for further backend processing. Is available as add-on to and only in conjunction with a full FlexiCapture for Invoices Cloud License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Web Capture Subscription	FCIC-S-MWC	Free for the Year 1; 10% of license list price (annual fee) starting from the

Mobile Capture Imaging

ABBYY Mobile Capture is an SDK which offers automatic data capture within native mobile applications, providing real-time recognition and capturing photos of documents for on-device or back-end processing. Is available as add-on to and only in conjunction with a full FlexiCapture for Invoices Cloud License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Capture Imaging Subscription	FCIC-S-MCI	10% of license list price, annual fee

Additional Design Tools

Additional design tools are available for 0-price supply in accordance with client's request

Tool	Part Number (SKU)	US Dollar (USD)
Project Setup Station	FCIC-S-APS	for free
FlexiLayout Studio	FCIC-S-AFL	for free

Development & Test System

- FlexiCapture Cloud for Invoices REST API enables tight integration with customer's core business systems, expands FlexiCapture for Invoices value due to better integration capabilities and easier consumption, modern architecture and faster service delivery options.
- Development & Test System/Backup license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the page count. If the development/test and backup systems are separate installations, each requires its own license. If the page volume is ≥ 300k invoice volume, one tenant (Test/Development/Backup) is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup tenant, one of them is for free, others are 20% of the base license.

Type	Part Number (SKU)	US Dollar (USD)
REST API	FCC00CH1XX-SPYCXX-API	for free
Development/Test/Backup License when a cloud subscription with invoice count less than 300k (page count less than 900k)	FCIC-S-BU	20% of license list price
Development/Test/Backup License FREE when a cloud subscription with 300k invoice count and above (page count 900k and above)	FCIC-BU-FL	for free

Connectors

ABBYY FlexiCapture Connectors provide the integration between ABBYY Capture products and different content-driven business applications.

Type	Part Number (SKU)	US Dollar (USD)
FlexiCapture Connector for Blue Prism	FCX00WXXXX-XAAXXX-BP	for free
FlexiCapture Connector for UiPath	FCX00WXXXX-XAAXXX-UP	for free
FlexiCapture Connector for M-Files	FCX00WXXXX-XAAXXX-MF	for free
FlexiCapture Connector for Pega	FCX00WXXXX-XAAXXX-PG	for free
FlexiCapture Connector for Appian	FCX00WXXXX-XAAXXX-AP	for free
FlexiCapture Connector for WinActor	FCX00WXXXX-XAAXXX-WA	for free
FlexiCapture Connector for Bizagi	FCX00WXXXX-XAAXXX-BZ	for free
FlexiCapture Connector for NX Manager	FCX00WXXXX-XAAXXX-NX	for free

Other add-ons

FormDesigner is a software application for creating machine-readable forms that will be processed using ABBYY FlexiCapture. This is available free of charge per request.
 We offer use of ISIS driver for high speed scanners in order to configure basic scanning options.
 ICR Handwriting add-on provides high accuracy of handwritten data processing. No discounts can be applied to this add-on even when a related license is discounted.

FlexiCapture Distributed full license includes all additional OCR languages excepting Japanese, which can be sold as a language add-on. Additional language support is offered for Japanese invoices in electronic machine-printed text in these licenses.

Type	Part Number (SKU)	US Dollar (USD)
FormDesigner	FC-P-FD	for free
ISIS driver	FC-P-AO-ISIS	for free
ICR Handwriting add-on	FCIC-S-ICR	40% of license list price
Language add-on	FCIC-S-AO-L	30% of license list price

FlexiCapture for Invoices Cloud Trial License

Trial volume is 1000 TPC (Total page count). Trial period is 30 days. Both products FlexiCapture for Invoices Cloud and FlexiCapture Cloud have the same Trial

Type	Part Number (SKU)	US Dollar (USD)
1000 TPC, 30 days		for free

Key Functionality & Features

The following functionality and features are included in the FlexiCapture for Invoices Cloud base license.

Functionality/Feature	Explanation
Supported invoice countries and languages	FlexiCapture for Invoices Cloud features a predefined set of processing rules (required keywords, language, currency, date formats, number formats, validation rules, tax rates, etc.) for a range of countries (Austria, Belgium, France, Germany, Great Britain, Ireland, Italy, Netherlands, Spain, Switzerland). Once the country of the invoiced business unit is identified, FCI applies the country-specific settings. Countries: Australia, Austria, Belgium, Canada, Czech Republic, France, Germany, Great Britain, Japan, Hungary, Ireland, Italy, Netherlands, New Zealand, Poland, Spain, Switzerland, United States. Languages: Bulgarian, Croatian, Czech, Dutch, English, French, German, Japanese, Hungarian, Italian, Polish, Romanian, Russian, Spanish, Swedish.
User Interface Languages	Chinese (Simplified), Czech, English, French, German, Hungarian, Japanese, Korean, Polish, Portuguese (Brazilian), Russian, Spanish, Serbian.
Intelligent capture & Natural Language Processing	Natural Language Processing (NLP) extends capture capabilities to process unstructured documents such as contracts, leases, articles, agreements, and emails. NLP is not available by default, please request it separately to finetune it for custom workflows. Supported languages: English, German, Russian, Spanish, French.
High Out-of-the-box quality	Get the superior quality when you only start using FlexiCapture for Invoices. The system is already trained with numerous variants of invoices, using neural networks technology, saving you time and money. When you begin processing the invoices, no need for you to start with the fine-tuning and training on the samples.
Ready-to-go PO processing	Automate purchase order processing with the preconfigured project that contains the fields, rules, country settings, and validation rules required to capture data from purchase orders. Built on the same principles and technologies used for invoice processing, the solution now provides out-of-the-box extraction of main fields both in purchase orders and invoices.
Out-of-the-box receipts processing for expense management	Streamline receipt processing for expense management without any additional configurations. Run this ready-to-use type of project to capture receipts from business trips or out-of-pocket expenses and flexibly customize the preconfigured receipts project to suit your business requirements.
Digitally born documents	Detect the exact type of digital documents (spreadsheets, images, logos, etc.) and different areas within a document, even when text appears unreadable. Word, Excel, PDF, email bodies, scanned images, and other digital documents can be processed in the same flow.
Image enhancement	Enhanced Image pre-processing enables automatic clean-up and enhancement of images arriving from desktop scanning or mobile scanning. All images go through image enhancement and pre-processing, a process in which scanned images are altered to make them more suitable for analysis and recognition. This process includes operations such as removing noise (e.g. de-speckling), de-skewing (rotate), correct distortions and binarisation.
Advanced Classification	Classify documents into different types (e.g., driver's license, bank statement, tax form, contract, invoice, etc.) and variations (e.g., invoices from different vendors) to automatically sort incoming documents and route them to predefined destinations. FlexiCapture offers image, text, or rule-based classification methods that can be combined into a hierarchical system to deliver the greatest straight-through processing performance and reduced manual review. Advanced classification enables document type identification, topic identification and automation of incoming emails, documents separation into different classes document set integrity check, documents identification that require processing within the flow and checks if signatures or stamps exist in the document.
PO matching	FCIC can match invoice data against the actual purchase orders at the verification stage (connection to a database of orders or contracts is required).
Line Items support	ABBYY supports table Line Items extraction such as: Article Number, Description, Unit Price, Quantity, TotalPriceNetto, VatCode, Vat Value, Vat Percentage, Total Price Brutto. A table extraction of line items can be performed with or without purchase order data.
Machine learning by user side	Increases extraction quality, while you use the solution, it starts learning by feedback on your documents. The more you use the solution, the better quality of results you get. Controllable on-the-fly training technology enables immediate data detection refinement directly by an accountant while reviewing the invoice. As opposed to "black-box"-like self-learning systems, ABBYY FlexiCapture for Invoices gives IT staff full control over the training results.
REST API	ABBYY FlexiCapture Cloud REST API enables easy integration with your systems. REST API allows external systems to upload documents and receive extraction results, trains FlexiCapture by providing feedback about the result quality, and develops customized verification.
Scalability and enhanced performance	The cloud-based service dynamically scales up to meet high load levels without requiring additional expenditures on resources and equipments
Single Sign-On	Single sign-on (SSO) enables users to securely authenticate with multiple applications and websites by logging in only once. The most popular identity providers, such as Active Directory, Azure Active Directory, OKTA, and Onelogin, are supported out-of-the-box.
Export file formats	Data export formats: XLS, DBF, CSV, TXT, XML, JSON Image export formats: TIFF, JPEG, PDF, PDF/A (Standard allows you to select the version of the format standard. By default, the version of the standard is detected automatically. For PDF/A the following standard versions are available: 1a, 1b, 2a, 2b, 2u, 3a, 3b, 3u), BMP, JPEG2000, PCX packbits, PNG
Flexible customization and integration	FlexiCapture Web API and customization scripts enable the development of custom solutions, support specific business scenarios, and ensure easy integration into enterprise workflows.

ABBYY FlexiCapture SDK for Windows Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as an ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from October 2019.

General information

FlexiCapture SDK is a delivery option of the FlexiCapture platform and provides developers with a powerful toolkit to smoothly integrate ABBYY's Capture technologies into own products and services.
BPOs are able to purchase Subscription licenses starting from 1M page count or TPC licenses of any volumes.

Delivery

FlexiCapture SDK can be delivered through a Developer license, a Developer package and a Runtime license:
 • Developer license is initial to buy and gives developers right for a project development at a pre-production stage.
 • Developers package is a toolkit which developers can use for a project development at a pre-production stage. It includes FlexiCapture project setup station and FlexiLayout studio.
 • Runtime license gives right for production use of FlexiCapture functionalities built in developer's product. It is measured by page count and can only be bought after a Developer license. Runtime invoice processing module is available as add-on under Runtime Subscription.
 • Trial are available on request for a Developer license and for a Developer package.

License protection

FlexiCapture SDK has 2 types of license protection depending on binding: Software protection - uses an activation file that should be obtained for a specific working machine from the ABBYY server during a license activation process; and Online protection - does not need activation, requires a persistent connection to the online licensing service, allows running FlexiCapture SDK inside the containers, on virtual machines and Public Cloud.

FlexiCapture SDK for Windows Developer Licenses

- FlexiCapture SDK Developer Licenses are available as Subscription Licenses. Prices are annual fee for 1-year subscription of Page volume 12k per Month.
- Developer subscription licenses are automatically prolonged after one year. FlexiCapture SDK Developer license can be delivered as three standalone licenses or one network license limited by 3 developers.
- A Developer license can have an Online protection (limited by 3 connections and 12k page count) or a Software protection (limited by 1 network installation for 12k page count, or 3 standalone installations with 4k page count each).
- Business support is included in a Developer license price and grants access to upgrades/patches.

Type	Part Number (SKU)	US Dollar (USD)
FlexiCapture SDK Developer license	FCSDK-W-S-D-PM	5,890 USD
Additional FlexiCapture SDK Developer license	FCSDK-W-S-D-PM-A	2,950 USD

FlexiCapture SDK for Windows Runtime Licenses

Subscription Licenses

Prices are annual fee for 1-year Subscription, Pages per Year. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. Cannot be used for web-based Cloud and SaaS.

PPY	Part Number (SKU)	US Dollar (USD)
100k	FCSDK-W-S-PY-100K	3,990 USD
200k	FCSDK-W-S-PY-200K	6,550 USD
300k	FCSDK-W-S-PY-300K	8,840 USD
500k	FCSDK-W-S-PY-500K	11,780 USD
750k	FCSDK-W-S-PY-750K	15,990 USD
1 million	FCSDK-W-S-PY-1M	19,360 USD
2 million	FCSDK-W-S-PY-2M	28,630 USD
3 million	FCSDK-W-S-PY-3M	38,640 USD
5 million	FCSDK-W-S-PY-5M	58,270 USD
10 million	FCSDK-W-S-PY-10M	110,400 USD
15 million	FCSDK-W-S-PY-15M	163,200 USD
20 million	FCSDK-W-S-PY-20M	213,120 USD
25 million	FCSDK-W-S-PY-25M	264,960 USD
50 million	FCSDK-W-S-PY-50M	515,210 USD

TPC (Total Page Count) Licenses

FlexiCapture SDK TPC Licenses are valid for 365 days from the activation date or until the page volume is used, whichever occurs first. The license cannot be extended. If it is expired, the user requires a new license to be able to continue using FlexiCapture SDK. Business SMUA is included in the license price and grants access to upgrades/patches. This license cannot be used for web-based Cloud and SaaS.

PPY	Part Number (SKU)	US Dollar (USD)
50k	FCSDK-W-O-TP-50K	2,690 USD
100k	FCSDK-W-O-TP-100K	4,800 USD
200k	FCSDK-W-O-TP-200K	7,860 USD
300k	FCSDK-W-O-TP-300K	10,610 USD
500k	FCSDK-W-O-TP-500K	14,140 USD
750k	FCSDK-W-O-TP-750K	19,190 USD
1 million	FCSDK-W-O-TP-1M	23,240 USD
2 million	FCSDK-W-O-TP-2M	34,360 USD
3 million	FCSDK-W-O-TP-3M	46,370 USD
5 million	FCSDK-W-O-TP-5M	69,930 USD
10 million	FCSDK-W-O-TP-10M	132,480 USD
15 million	FCSDK-W-O-TP-15M	195,840 USD
20 million	FCSDK-W-O-TP-20M	255,750 USD
25 million	FCSDK-W-O-TP-25M	317,960 USD
50 million	FCSDK-W-O-TP-50M	618,250 USD

FlexiCapture SDK for Invoices for Windows Runtime Licenses

Subscription Licenses

FlexiCapture SDK for Invoices licenses are available as Runtime Subscription Licenses. Prices are annual fee for 1-year Subscription, Invoices per Year. One invoice contains 3 pages. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. This license cannot be used for web-based Cloud and SaaS.

ABBYY FlexiCapture SDK provides an API for out-of-the-box invoice processing. It includes pre-defined settings, validation rules, and advanced database look-up capabilities specifically tailored for processing invoices. The technology can identify data fields on the vast majority of invoices, enabling users to start processing right away. Intelligent learning-by-feedback technology refines the extraction of data from invoices with non-standard layouts.

FlexiCapture SDK supplies ready-to-use invoice projects for Australia and New Zealand, Canada, the European Union, and the United States of America. The invoice project may be created either via graphical user interface in FlexiCapture Developer's Package or directly via API in FlexiCapture SDK.

IPY	Part Number (SKU)	US Dollar (USD)
5k (15k PPY)	FCSDK-W-AO-S-IY-5K	1,670 USD

10 million (30m PPY)	FCSDK-W-AO-S-IY-10M	504,020 USD

FlexiCapture SDK for Windows On-Premise Add-Ons

Mobile SDK add-ons

Mobile Web Capture

ABBYY Mobile Web Capture is a JavaScript based SDK that can be embedded into web-based on-boarding processes to automatically capture any document using a mobile camera and submitting the image to FlexiCapture SDK for further backend processing. Is available as add-on to and only in conjunction with a full FlexiCapture SDK License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Web Capture Subscription	FCSDK-S-MWC	30% of license list price, annual fee
Mobile Web Capture One-time	FCSDK-O-MWC	30% of license list price

Mobile Capture Imaging

ABBYY Mobile Capture is an SDK which offers automatic data capture within native mobile applications, providing real-time recognition and capturing photos of documents for on-device or back-end processing. Is available as add-on to and only in conjunction with a full FlexiCapture SDK License.

Type	Part Number (SKU)	US Dollar (USD)
Mobile Capture Imaging for a Subscription license	FCSDK-S-MCI	30% of license list price, annual fee
Mobile Capture Imaging for a TPC license	FCSDK-O-MCI	30% of license list price
Runtime Development & Test System, Backup License		
This license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the page count. If the development/test and backup systems are separate installations, each requires its own license. If the page volume is ≥ 1 million page volume, one license (Test/Development/Backup) is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup license, one of them is for free, others are 20% of the base license.		
PPY	Part Number (SKU)	US Dollar (USD)
when a full license is Subscription with 50k - 750k page count	FCSDK-W-S-TE	20% of license list price, 20% of page amount
FREE when a full license is Subscription with 1m pages count and above	FCSDK-W-S-TE-FL	for free
when a full license is TPC with 50k - 750k page count	FCSDK-W-O-TE	20% of license list price, 20% of page amount
FREE when a full license is TPC with 1m pages count and above	FCSDK-W-O-TE-FL	for free
Other add-ons		
FormDesigner is a software application for creating machine-readable forms that will be processed using ABBYY FlexiCapture. This is available free of charge per request. We offer use of ISIS driver for high speed scanners in order to configure basic scanning options. ICR Handwriting add-on provides high accuracy of handwritten data processing. No discounts can be applied to this add-on even when a related license is discounted. FlexiCapture SDK full license includes all additional OCR languages excepting Japanese, which can be sold as a language add-on. Additional language support is offered for Japanese language to recognize machine printed text in these language.		
Type	Part Number (SKU)	US Dollar (USD)
FormDesigner	FC-P-FD	for free
ISIS driver	FC-P-AO-ISIS	for free
Subscription ICR Handwriting add-on	FC-S-ICR	40% of license list price
Subscription Language add-on	FCSDK-W-S-AO-L	30% of license list price
TPC Language add-on	FCSDK-W-O-AO-L	30% of license list price
FlexiCapture SDK for Windows Trials		
A trial is available for the Developer license with a volume 10K TPC (Total page count) for a period of 60 days. A trial is available for a Developer package with 1 FlexiCapture project setup station and 1 FlexiLayout studio for a period of 60 days.		
Type	Part Number (SKU)	US Dollar (USD)
Developer license trial		for free
Developer package trial		for free

Key Functionality & Features

The following functionality and features are included in the FlexiCapture SDK base license.

Functionality/Feature	Explanation
Developer tools	The FlexiCapture SDK API conforms to the COM standard and can be easily used in C/C++, C#, Python, or any other development tools supporting COM components. Additionally, SDK supports programming in Java.
Supported languages	ABBYY FlexiCapture 12 SDK recognizes 200 languages for OCR, including: 127 languages for ICR and 56 languages with full dictionary support.
Supported digital document input formats	ABBYY FlexiCapture 12 SDK accepts input digital documents in the following formats: text documents: DOC, DOCK, RTF, HTML, TXT, ODT tables: XLS, XLSX, ODS presentations: PPT, PPTX, ODP
Supported document saving formats	ABBYY FlexiCapture SDK allows you to export recognized data in the following formats: Microsoft Office Excel Workbook (*.XLS) DBase file (*.DBF) Comma Separated Values File (*.CSV) Simple text (*.TXT) XML Document (*.XML)
Image enhancement and quality control	The feature allows developers to work with the complex backgrounds of documents like IDs, insurance policies, etc. For instance, the following image corrections can be applied: -Automatic correction of resolution -Overwriting resolution of the image to a specified resolution -Correction of the image skew angle based on black separators, black squares, or text -Conversion of the image to black and white -Rotation, inversion, and mirroring of the image -Reduction of ISO noise -Removing of color marks and garbage -Automatic crop of the image It is also possible to apply a pre-configured image enhancement profile to images.
Advanced classification	Advanced document classification helps sort incoming documents into categories using a pre-configured classifier available via API. The classification technologies are highly flexible and can be used to distinguish: - Document types like invoices, bank statements, tax forms, claims, etc. - Document variations within a document type, such as invoices from different vendors - Document boundaries, such as the first and subsequent pages of documents of each type. FlexiCapture SDK provides the API to train a classifier from scratch and uses the trained classifier inside the application to speed up document processing.
Learning by feedback	FlexiCapture SDK allows developers to implement training for field extraction and classification technology to improve accuracy of field extraction and classification. The technology learns basing on feedback provided from end-users. This feedback may be collected in any third-party component for verification, be implemented by the developer, and contain information on correct field regions (to train the fields extraction technology) and on correct image classes (to train the classification technology).
API-based setup	FlexiCapture SDK provides both options for creating projects – either using the graphical user interface in the FlexiCapture Developer's Package or via API. This is important in the development of document management systems, where developers may need to modify the metadata, which is extracted and available for each document right from their solution. Business process outsourcers who have many FlexiCapture projects may need to tune a specific field's setting automatically, without needing to go through each project.
Verification	FlexiCapture SDK provides API interfaces for data verification, performed by comparing recognition results with the image of any document part. The results of the verification can be used for teaching the technology to improve accuracy of extraction and classification.
Digitally born documents	ABBYY FlexiCapture SDK processes office documents in all popular formats. All documents can be processed in the same flow with no need to separate image formats from text formats. SDK supports text documents in DOC, DOCK, RTF, HTML, TXT, and ODT formats; XLS, XLSX, and ODS tables; and presentations in PPT, PPTX, and ODP.
Flexible export options	Export options include the ability to save all relevant data into backend applications and to convert analyzed documents into searchable PDF or PDF/A formats for archiving purposes. Data capture technologies export data to structured formats (like XML or CSV) or other storage locations. For some formats, the images of the original documents are also saved to make them easy find and compare if needed.
Developer's Package	To simplify initial setup of data capture process, together with FlexiCapture 12 SDK, the distributive developer receives the FlexiCapture 12 Developer's Package. It includes the FlexiCapture Project Setup Station and the FlexiLayout Studio. The Developer's Package may be used to set up FlexiCapture projects for further usage in FlexiCapture SDK. All FlexiCapture projects created in FlexiCapture Developer's Package and shipped with FlexiCapture SDK may be used in FlexiCapture SDK and vice versa.
Code samples library	Code samples are provided for C#, C++, Visual Basic, .NET, Java, and scripting languages and help developers recognize how to: get started, use advanced classification capability, train fields extraction, implement invoices processing with autolearning

To learn more about the supported functionality please follow the link <https://www.abby.com/en-us/flexicapture-sdk/specifications/>

ABBYY FineReader Server Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from April 2020.

General information

FineReader Server is a server-based OCR and PDF conversion offering which converts scanned and electronic documents into PDF, PDF/A, Microsoft Word, or other formats for search, long-term retention, collaboration, or additional processing – quickly, accurately, and automatically.

Standard Delivery Package

- FineReader Server license includes one work station of each type (Scanning, verification, indexing, administrator console). All Stations are concurrent and deployed as local stations (domain network). Indexing and Verification stations can be deployed as remote stations, too.
- FineReader Server license includes functionalities: API: COM API, Web API & XML Tickets. Remote Administration Console.
- FineReader Server license includes Thai, Vietnamese, Hebrew, Cyrillic+Latin languages.

FineReader Server Pages-based Licenses

Page-based licenses are available only as Subscription.

Subscription Licenses

Prices are annual fee for 1-year Business Subscription, Pages per Year. Enterprise clients should be quoted for Enterprise Subscription. 3-year subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. Business Subscription can be upgraded to Enterprise Subscription (which includes a more advanced support level) for an additional payment.

Business Subscription

PPY	Core limitation	Part Number (SKU)	US Dollar (USD)
100k	No Limit	FRS-S-100K-PPY	1,290 USD
300k	No Limit	FRS-S-300K-PPY	2,670 USD
500k	No Limit	FRS-S-500K-PPY	3,260 USD
1 million	No Limit	FRS-S-1M-PPY	4,440 USD
3 million	No Limit	FRS-S-3M-PPY	11,330 USD
5 million	No Limit	FRS-S-5M-PPY	16,780 USD
10 million	No Limit	FRS-S-10M-PPY	30,000 USD

Enterprise Subscription

Type	Part Number (SKU)	US Dollar (USD)
Upgrade from Business to Enterprise subscription with minimal annual recurring revenue \$50K	FRS-S-E	=Business Subscription price*0,15

FineReader Server Core-based Licenses

Core-based license model allows processing of any number of pages and documents. In order to scale the installation and a higher speed and total throughput, further processing cores can be added to the same standard license purchased. Re-activation of the license is required.

Rules of additional cores quantity at the moment of initial sale:

- for 1 main core sell any amount of "Additional 1-Core" add-on ONLY
- for 2 main cores sell any amount of "Additional 1-Core" AND "Additional 2-Cores" add-ons
- for 4 main cores sell any amount of "Additional 1-Core" AND "Additional 2-Cores" AND "Additional 4-Cores" add-ons.

Subscription Licenses

Prices are annual fee for 1-year Business Subscription, Cores per Year. Enterprise clients should be quoted for Enterprise Subscription. 3-year subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. Business Subscription can be upgraded to Enterprise Subscription (which includes a more advanced support level) for an additional payment.

Business Subscription

Cores	Pages limitation	Part Number (SKU)	US Dollar (USD)
1-Core	No Limit	FRS-S-C	4,370 USD
2-Cores	No Limit	FRS-S-2C	6,400 USD
4-Cores	No Limit	FRS-S-4C	9,600 USD
Additional 1-Core	No Limit	FRS-S-C-ADD	3,280 USD
Additional 2-Cores	No Limit	FRS-S-2C-ADD	4,800 USD
Additional 4-Cores	No Limit	FRS-S-4C-ADD	7,470 USD

Enterprise Subscription

Type	Part Number (SKU)	US Dollar (USD)
Upgrade from Business to Enterprise subscription with minimal annual recurring revenue	FRS-S-E	=Business Subscription price*0,15

FineReader Server Trial

A Trial License is a Total Page Count, license valid for 30 days from the date of purchase or until the page volume of 1K is used, whichever occurs first.

TPC	Core limitation	Part Number (SKU)	US Dollar (USD)
FRS trial 1K TPC, 30 days	No Limit		for free

FRS Add-Ons

Additional Workstations

One workstation of each type (Scanning, Verification, Indexing, Administrator Console) is included in the standard delivery package by default. Additional Scanning, Verification and Indexing stations are available:

Type	Part Number (SKU)	US Dollar (USD)
Additional Scanning Station Subscription, yearly fee	FRS-S-SSA	540 USD
Additional Verification Station Subscription, yearly fee	FRS-S-VSA	540 USD
Additional Indexing Station Subscription, yearly fee	FRS-S-ISA	540 USD

Development & Test System, Backup License

This license is available for non-production use as add-on to and only in conjunction with a Full License. It provides the same functionality as the Full License but is limited to 20% of the page count for pages-based licenses and to 100K pages for core-based licenses. If the development/test and backup systems are separate installations, each requires its own license. If the page volume is ≥ 5 million PPY or amount of cores is ≥ 4, one license is included in the standard delivery package by default. If customer needs more than 1 Test/Development/Backup license, one of them is for free, others are 20% of the base license.

Type	Part Number (SKU)	US Dollar (USD)
when a full license is Subscription with page count less than 5m or amount of cores less than 4	FRS-S-BU	20% of license list price, annual fee
FREE when a full license is Subscription with 5m page count or 4 cores (and above)	FRS-S-BU-FL	for free

OCR Languages

FineReader Server Full License includes Thai, Vietnamese, Hebrew, Cyrillic+Latin languages. Arabic, Fraktur, CJK languages are available as add-ons.

Type	Part Number (SKU)	US Dollar (USD)
Arabic (Farsi is part of this add-on) for a subscription license	FRS-S-AO-ARB	30% of license list price, annual fee
CJK (Chinese, Japanese, Korean) for a subscription license	FRS-S-AO-CJK	30% of license list price, annual fee
Gothic/Fraktur OCR for a subscription license	FRS-S-AO-FRK	30% of license list price, annual fee

FRS Standard Delivery Package Components

Type	Quantity	Installation
Workstations		
Scanning Station	1 station included	Rich
Verification Station	1 station included	Rich
Indexing Station	1 station included	Rich
Administration		
Remote Administration Console	Unlimited	Rich
Processing Components		
Processing Stations	Unlimited	-
Server Manager	1 server license included	-

Key Functionality & Features

The following functionality and features are included in the FineReader Server base license.

Functionality/Feature	Explanation
Recognition languages	Support for over 200 OCR (Normal, Advanced, Matrix, OCR A, OCR B, Typewriter) languages in all combinations. Dictionary support is available for 49 languages. The list of all OCR languages is available at https://www.abbyy.com/en-ee/finereader-server/specifications/ . Arabic, CJK, Gothic / Fraktur languages are available as a paid add-ons (30% from the base license).
User Interface Languages	Chinese (Simplified), Czech, English, French, German, Hungarian, Japanese, Korean, Polish, Portuguese (Brazilian), Russian, Spanish.

Server-based architecture	Uses all available hardware resources in the most efficient way possible.
High-volume scalability	Converts large volumes of documents in a short time frame.
Flexible PDF technology	Compresses PDFs to minimize file size while preserving quality; supports PDF/A (-1a, -1b, -2a, -2b, -2u, -3a, -3b, -3u), PDF/E, PDF/UA formats. Support of digital signatures and watermarking.
Import formats	Image files (TIFF, Multipage TIFF, JPEG, JPEG 2000, JBIG2, BPM, GIF, PNG, WDP, XPS, PCX, DCX); Office documents (PDF, DjVu, DOC, DOCX, ODT, XLS, XLSX, ODS, PPT, PPTX, ODP, TXT, HTML, HTM, RTF); Emails, Mail servers supported protocols: IMAP, MAPI, POP3 - Like MS Exchange, Google Mail, IBM Domino, etc., Mail message files stored in file system - Like MSG and EML files
Export formats	PDF (PDF/A-1a, PDF/A-1b, PDF/-2a, PDF/A-2b, PDF/A-2u, PDF/-3a, PDF/A-3b, PDF/A-3u, PDF/E, PDF/UA), RTF, DOC, DOCX, XLS, XLSX, TXT, CSV, HTML, TIFF, JPEG, JPEG 2000, PNG, EPUB, XML, Alto XML, FineReader internal format (FineReader Engine-compatible)
Integration with SharePoint	Automatically converts documents from SharePoint libraries into searchable PDFs.
Barcode recognition	Detect with help of AI and reads 1D and 2D barcodes to enable document separation and/or addition of metadata.
Document types and metadata	Auto-assigns document types and attributions; allows for manual creation of metadata if needed.
Recognition of historical fonts	Supports black letter, Schwabacher, and most other Gothic fonts in English, German, French, Italian, and Spanish.
Integration into existing systems	Connects easily with digital archives or enterprise content management systems via XML tickets, COM-based APIs, and web service APIs, including REST API.
Document separation	Automatically separates documents based on number of pages, blank pages, barcode pages, and/or scripted rules.
Audit report	Analyze repositories to identify file types and number of searchable, unsearchable documents and duplicates.

ABBYY FineReader Engine Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from October 2020 for all new FineReader Engine clients and for clients with ongoing FineReader Engine contracts it they fit into proposed commercial models.

General information

- The software development kit ABBYY FineReader Engine allows to create applications that extract textual information from paper documents, images or displays. This AI-powered OCR SDK provides your application with excellent text recognition, PDF conversion, and data capture functionalities, enabling it to convert scans into searchable PDF, Word or Excel documents, and access data on photos or screenshots.
- Enterprise clients can purchase FineReader Engine in a form of the Enterprise package.
- BPO clients purchase FineReader Engine as a combination of Developer and Runtime TPC licenses.
- A client can choose between Online and Software license protection.
- Prices are the same for any platform of: Windows, Linux, Mac. Distinguish between platforms by means of an SKU. Choose depending on a platform indicator in a code: W - for Windows, L - for Linux, M- for Mac.

Standard Delivery Package

- FineReader Engine license includes: Automated document analysis, Barcode processing, Field Processing, Visual Components processing, Adaptive Document Recognition Technology, 210 OCR languages, 126 ICR languages.
- Processing of one page A4 or smaller reduces the page count by one page.

FineReader Engine On-Premise Base Licenses

FineReader Engine Enterprise Package

FineReader Engine Enterprise Package contains everything that a client needs for a project:

- Developer toolkit for 3 Standalone licenses with Software protection - 10K PPM limit per each, or Developer toolkit for 1 Network license with Online or Software protection for 3 concurrent users - 30K PPM limit all together;
- Runtime page volume license;
- No core limitation.

Enterprise Package Subscription

Prices are annual fee for 1-year Subscription, Pages per Year. 3-year subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Support and Maintenance is included in the license price and grants access to upgrades/patches. A client can be invoiced on a comfortable period base (monthly/quarterly/yearly).

PPY	Part Number (SKU)	US Dollar (USD)
100k		5,059 USD
300k		8,112 USD
500k		9,629 USD
1 million	FRE-P-W-S	13,439 USD
3 million	FRE-P-L-S	28,470 USD
5 million	FRE-P-M-S	42,337 USD
10 million		75,270 USD
30 million		178,263 USD

FineReader Engine BPO license

Trial BPO Developer license

There are the following options of the Trial Developer BPO license for FineReader Engine:

- Total Page Count license valid for 60 days from the date of activation or until the page volume of 10K is used, whichever occurs first.
- Total Page Count license valid for 30 days from the date of activation or until the page volume of 5K is used, whichever occurs first.

Description	US Dollar (USD)
FineReader Engine BPO Developer Trial: 10K TPC for 60 days	for free
FineReader Engine BPO Developer Automated Trial: 5K TPC for 30 days	for free, available through www.abbyy.com

BPO Developer license

FineReader Engine Developer BPO toolkit can be purchased as 3 Standalone licenses with Software protection with 10K PPM limit per each, or as 1 Network license with Online or Software protection for 3 concurrent users with 30K PPM limit all together. Prices below are annual fee for 1-year Subscription for a FRE Developer license and depend on the Client's commitment term. All add-ons, Business Support and Maintenance are included in the price.

Type	Part Number (SKU)	US Dollar (USD)
FRE Developer License Subscription with 3 years commitment	FRE-E-D-W-S3	5,900 USD
	FRE-E-D-L-S3	
	FRE-E-D-M-S3	
FRE Developer License Subscription with 2 years commitment	FRE-E-D-W-S2	6,500 USD
	FRE-E-D-L-S2	
	FRE-E-D-M-S2	

FRE Developer License Subscription with 1 year commitment	FRE-E-D-W-S1 FRE-E-D-L-S1 FRE-E-D-M-S1	7,100 USD

ABBYY Cloud OCR SDK Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from October 2020.

General information

- Cloud OCR SDK is web-based document processing service that enhances customer's enterprise software systems, SaaS platforms with the ability to convert documents and utilize textual information from scans, PDFs, document images, smartphone photos, or screenshots.
- Cloud OCR SDK is hosted on Microsoft Azure cloud environment.
- Cloud OCR SDK is available as a Pages limited Subscription license only. It allows the usage of unlimited CPU cores.
- The multi-tenant architecture allows several different groups of users to work within the system while having no access to each other's data and configuration parameters.

Standard Delivery Package

- Cloud OCR SDK license includes: all recognition languages, OCR, ICR, Barcode recognition, MRZ processing, Business Card Processing, Receipt Processing, Field Processing.
- Processing of one page A4 or smaller reduces the page count by one page.

Cloud OCR SDK Licenses

Subscription Licenses

Prices are annual fee (prepayment), Pages per Year. Additional pages consumption is paid at the year-end and is quoted per page with an Overage rate which depends on an originally subscribed page volume. A customer can set a limit for a maximum number of overage pages.

2-years subscription is the minimum commitment for every deal. Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year. Technical Support is included in the license price and grants access to upgrades/patches.

		Price per volume	Overage rate per page
PPY	Part Number (SKU)	US Dollar (USD)	US Dollar (USD)
250k	COS00CXXX-SPRXXX	6,703 USD	0.0282 USD
500k		13,406 USD	0.0282 USD
1 million		26,813 USD	0.0282 USD
2 million		45,581 USD	0.0239 USD
4 million		85,800 USD	0.0225 USD
8 million		150,150 USD	0.0197 USD

Key Functionality & Features

The following functionality and features are included in the Cloud OCR SDK base license.

Functionality/Feature	Explanation
Input image formats	BMP, PCX; DCX, PNG, JPEG, TIFF, GIF, DjVu, JBIG2
Recognition languages	Support for over 200+ recognition languages in all combinations (no add-on languages). ICR (handprinted) is available for 126 languages. The list of all OCR languages is available at https://www.abbyy.com/cloud-ocr-sdk/specifications/
Text recognition	Text recognition of a full page (A4 or smaller) reduces the page counter by one page.

Field recognition	Recognition of individual fields (with provided co-ordinates) reduces the page counter by 1/5 page (0,2 page).
Recognition och Checkmarks	Recognition of a Checkmark is charged as 1 Field (=0,2 pages).
Business Card Recognition	Processing on one business card reduces the count by 2 pages
Machine-Readale Zones in ID Documentes	Processing on one machne readable zone reduces the count by 1 page.
Barcode processing	Barcode recognition is performed for free for up to 100 Barcodes per day. Above 100 Barcodes per day, every Barcode recognition is charged as 1 Field (=0,2 page).
Scalability and enhanced performance	The cloud-based service dynamicaly scales up to meet high load levels without requiring additional expenditures on resources and equipments.
REST API	ABBYY Cloud OCR SDK provides a REST API that enables easy integration with the own systems using a POST and GET commands.
Service Level Agreement	ABBYY guarantees cloud service availability of 99%.
Data processing locations	It is possible to select a data processing location within the USA or within the European Union. The data processing location has to be selected for each application individually and cannot be changed later on.
Export file formats	Data export formats: TXT, RTF, DOCX, XLSX, PPTX, PDF (with a text layer under the original image as well as 'text and images' format), PDF/A-1a, XML, ALTO, vCard, CSV

To learn more about the supported functionality please follow the link <https://www.abbyy.com/cloud-ocr-sdk/specifications/>

ABBYY Timeline (TPI) Price List - North America

Please note:

- This price list is confidential information of ABBYY USA Software House, Inc. and provided to you as a ABBYY Solution Partner for internal use only. Distribution of this document outside your organization or any changes to the content of this price list is strictly prohibited.
- All prices are quoted in USD and exclude Sales Tax.
- Prices contained herein are subject to change without prior notice.
- This Price List is valid starting from July 2021.

General information

- ABBYY Timeline automatically discovers maps process flows, provides prepackaged tools which help to analyze process behaviors and optimize performance, to improve customer satisfaction and service delivery. ABBYY Timeline automatically monitors process execution in near real-time and alerts staff to deviations to sustain peak performance. It predict outcomes early on, and ensure positive outcomes as well.
- A Timeline 'Project' is defined as a container for data being analyzed as well as definitions such as queries, custom metrics, dashboards and other objects that support a project.
- 'Timeline' limits refer to each instance of a process being analyzed. Such as number of invoices or number of onboarding instances.
- Subscribing companies are permitted an unlimited number of internal users of the licensed software.
- Internal users shall be defined as direct employees or paid contractors of the subscribing company.

ABBYY Accelerator License

- 6 month one-time license for up to 5 projects and 2M timelines which is intended to prove Timeline's usefulness for customer's use cases. At the end of 6 months a 1 year subscription will be invoiced and billed to the customer (not another 6 month term). This license expires either after 6 months or when 2M timelines limit is used. Requires approval of ABBYY sales leader for region.

Type	Part Number (SKU)	US Dollar (USD)
Timeline Accelerator	TI-A	54,000 USD

ABBYY Timeline Base Licenses

- Prices are annual fee for 1-year Business Subscription. Enterprise clients should be quoted for Enterprise Subscription. Subscription license is automatically prolonged after one year. Business SMUA is included in the license price and grants access to upgrades/patches. Business Subscription can be upgraded to Enterprise Subscription (which includes a more advanced support level) for an additional payment.
- Start date of a license begins the contract effective date (if any) or the date a license is fulfilled. Subscription license is automatically prolonged after one year.

Business Subscription

Base Licenses

Projects Per Year	Part Number (SKU)	US Dollar (USD)
Timeline Up to 5 Projects (up to 2 M timelines)	TI-5P-2MT	108,000 USD
