

Checklist to Optimize the Value of Your Third-Party Relationships

Define the portfolio of contracts and business imperatives for managing third-party relationships and contracts.	5
Stratify your suppliers into tiers to align the necessary controls commensurate to their impact to the business.	
Canvas the organization to gather all contractual documents; creating a document repository to store contracts, SOWs, exhibits, changes, service levels, invoices – everything related to that relationship.	
Itemize key contract meta data and clauses in a database to visualize and analyze the spend forecast, upcoming renewals, or risks from inconsistent contractual language.	
Validate supplier delivery compliance of key deliverables and obligations.	
Enable a responsive and easy to use contracting capability (request, creation, approval and onboarding) to ensure proper controls across an ever-evolving portfolio of contracts.	
Regularly assess/survey high-risk third- and fourth-party suppliers for ongoing delivery compliance to regulatory and risk control obligations.	
Monitor market innovation and regularly analyze supplier services, delivery performance and pricing to the market to optimize spend or take advantage of new technologies.	is generation of the second se
Take a pulse of business and user satisfaction of supplier delivery, align against service performance, and action improvement planning.	Auser Statuer Statuer Auser Statuer
Monitor news and changes in your supplier ecosystem to assess the risk impact to your business.
